

DNYANESHWAR SURYWANSHI

TEAM LEAD & SENIOR TEST AUTOMATION ENGINEER

SKILLSET

Technical Skills

- Test Automation Tools & Frameworks:
 - Robot Framework, Python, Selenium, Appium, Cypress
- AI & LLM-Assisted Testing
 - GitHub Copilot
 - LLMs for test generation
 - LLM-based Robot Framework & Python automation generation
 - AI-assisted test analysis, requirements analysis, defect analysis
 - AI-based visual testing
- CI/CD & Containerization:
 - Jenkins, Docker
- API Testing & Tools:
 - Postman, Rest API
- Testing Methodologies:
 - User Acceptance Testing, Regression Testing, Load Testing, Performance Testing, Functional Testing, Smoke Testing, Memory Leak Testing, KPI & Stability Testing, Alpha and Beta Testing,
- Development Methodologies:
 - Agile (Scrum, Kanban, SAFe)
- Version Control Systems:
 - GIT, Sourcetree, Bitbucket
- Test & Defect Management Tools:
 - Test Management: Testrail, PractiTest, Zephyr, Kanban, JIRA
 - Bug Tracking: JIRA, Bugzilla, Jama
- Collaboration & Documentation:
 - Confluence, Jama
- Code Quality Tools:
 - Pylint, Robocop, Robotidy
- Operating Systems & Platforms:
 - Windows, Linux(Debian), Android, iOS, POS, WebOS
- Embedded Devices:
 - Android, iOS, POS, TV
- 3D Printing & CNC Automation:
 - 3D Printing: Cura, Sketchup
 - CNC Automation: OpenBuilds, UniversalGcodeSender

Leadership Skills

- Team Management
 - Successfully led teams for Android, Web UI, and API Automation Testing projects, providing technical guidance and day-to-day team support.

EDUCATION

2013 - 2017

K. J. Somaiya College Of
Engineering
(Bachelor Of Engineering In
Electronics)

LANGUAGES KNOWN

- English
- Hindi
- Marathi

CERTIFICATIONS

- ISTQB Certified Tester
Foundation Level 4.0
- Elements of AI: Introduction
to AI(University of Helsinki
and Reaktor)

- <https://softability.fi/insights/why-robot-framework-is-your-essential-tool/>
- <https://softability.fi/insights/software-testing-with-advanced-web-automation/>

- Team Lead Responsibilities
 - Actively involved in onboarding new hires, including training, knowledge transfer, and ramp-up support.
 - Conducted regular one-on-one feedback sessions, performance discussions, and career guidance for team members.
 - Served as a point of contact for team members,
- Client Interaction
 - Actively involved in client POCs, securing projects and delivering impactful demos.
- Mentorship
 - Conducted peer sessions, seminars, and webinars on test automation, AI(Artificial Intelligence), and Robot Framework for both new and experienced professionals.
- Process Improvement
 - Introduced tools, frameworks, and quality gates while optimizing team workflows and ensuring project quality.

EXPERIENCE

Softability Oy	
Team Lead	Jan 2025 - Present
Senior Test Automation Engineer	May 2024 - Present
Test Automation Engineer	May 2022 - June 2024

Client: Konecranes

- **Project Contributions:**
 - Played a key role in a project involving crane control systems, delivering efficient solutions for system functionality and testing.
- **Tool and Process Introductions:**
 - Introduced various tools, including test automation tools, quality gates, and parallel running processes to enhance the team's productivity and efficiency.
 - Implemented report management systems, ensuring clarity and better tracking of progress and issues.
- **Codebase Modernization & Pipeline Optimization:**
 - Improved a complex legacy codebase, organizing and refining it for better readability and maintainability.
 - Created and modified Jenkins pipelines, introducing quality gates for code and enhancing code quality standards.
 - Developed a generic, reusable test automation framework, adaptable to new environments with minimal changes, simplifying onboarding for new projects.
- **Knowledge Sharing & Client Interactions:**
 - Conducted demos for visiting companies, showcasing innovations and methodologies.
 - Led peer sessions, seminars, and webinars on AI and test automation, catering to both newcomers and experienced professionals, to foster learning and skill development within the team.

Client: Kone

- **Project Contributions:**
 - Worked on an Elevator Control Software project as part of the System Integration Testing (SIT) team, validating integrated software components and system behaviour.
- **System Integration & Manual Testing:**
 - Designed and executed manual system and integration test cases based on software requirements.
 - Performed end-to-end testing, logged defects, and supported verification of fixes.

TECHNICAL INTERESTS

- Robotics
- 3D Design & Printing
- Graphics Designing
- Video/Photo Editing

VOLUNTEER WORK

- CSR member

- **Quality Assurance & Collaboration:**
 - Collaborated with development and integration teams to ensure expected software behaviour and quality standards.
 - Maintained test documentation, execution reports, and defect records.
- **Knowledge Sharing & Client Interactions:**
 - Shared testing insights with team members and supported onboarding activities.

L&T Technology Services Ltd

Senior Engineer	Jan 2022 - May 2022
Engineer	Nov 2018 - Jan 2022
Associate Engineer	Oct 2017 - Nov 2018

Clients: Intel, Orbic mobiles USA, Zebra, Denso, Zee5, SonyLiv, Nets

- **Extensive Experience in Diverse Domains:**
 - Successfully contributed to projects spanning Android, iOS, Streaming Apps, Web, WebOS (TV), Embedded Systems, POS Payment Applications & Terminals, APIs, and Control System Testing.
- **Testing Expertise:**
 - Proficient in both manual and automation testing with expertise in various methodologies, including Regression Testing, Load Testing, Performance Testing, Functional Testing, Smoke Testing, Memory Leak Testing, KPI & Stability Testing, Alpha and Beta Testing.
- **Leadership & Team Management:**
 - Demonstrated leadership in projects related to Android, Web UI, and API Automation Testing by managing teams, designing effective test strategies, and delivering high-quality outputs.
- **Technical Proficiency:**
 - Skilled in Test Design, Test Creation & Architecture, Test Management, Report Management, Bug Tracking, Version Control, Continuous Integration and Code Quality Control.
- **Development and Testing Methodologies:**
 - Well-versed in industry-standard approaches, including Agile and Waterfall models.
- **Client Engagements & Mentoring:**
 - Actively involved in client POCs, securing multiple projects through tailored solutions.
 - Delivered impactful demos for clients and stakeholders to showcase solutions and testing outcomes.
 - Conducted training sessions, grooming colleagues in test automation and frameworks like the Robot Framework.
- **Additional Technical Expertise:**
 - Experience in 3D Printing & Designing and CNC Automation, showcasing versatility in engineering and technical domains.
